AIRCRAFT SALES

- We make an independent analysis. We assess the Buyer's needs in detail and identify the aircraft type(s) that most closely meet those needs.
- We search the market worldwide to locate the best quality and value aircraft available.
- We negotiate a fair market price and make a verbal agreement to purchase on behalf of the Buyer.

AIRCRAFT SALES

- We conduct an initial inspection of the aircraft, diagnosing all obvious faults.
- We prepare a written Aircraft Purchase Offer and arrange for a refundable deposit (usually between 5 and 10%) to be lodged with a reputable Title & Escrow company. This allows the aircraft to be withdrawn from the market until negotiations are complete.

AIRCRAFT SALES

- We arrange an in-depth Pre-Purchase Inspection (PPI) to be carried out at a reputable maintenance facility. This will cover all aspects of the aircraft, including passenger amenities, quality of furnishings and maintenance history.

The cost of the PPI is initially Buyer but is later refunded by the Seller if everything is found to be satisfactory.

AIRCRAFT SALES

→ We prepare a draft Aircraft Purchase Agreement which is sent to both Buyer and Seller for review and formulation into a binding contract. This details such things as payment of the purchase price, delivery ferry flight, importation and re-registration, as required.

→ We arrange a flight test to ensure that all systems function satisfactorily.

AIRCRAFT SALES

- ➔ If desired, we will arrange for painting the aircraft in a personal colour scheme and design prior to final delivery.
- ➔ Finally, if required, we will arrange for the aircraft's crewing and operation, whether for purely personal use or management for charter.

We check all documents of the private jet, before you charter it

Before we offer the aircraft to you, we will have an eye on the AOC (Air Operator Certificate), the last maintenance and the insurance of the aircraft, the flight hours of the crew, and on many further details.

AIRCRAFT CHARTER

From anywhere to your preferred destination, we will offer you the right aircraft.

For example: If you have long distance flights and you take a business jet, sometimes it is more convenient to take a heavy jet, because with a midsize jet you have more fuel stops and no standing height in the a/c. The heavy jet has more speed, so you gain time and have to pay less on the flight hours.

But, whether you are looking for a small, midsize or a heavy Jet, a 50seater, or a Helicopter, **You can be assured we will offer to you the best solution.**

It doesn't matter, if you want to depart from Europe, Asia or America.
